

Online courses open up a world of content and flexible implementation options. Whether students are at grade level, falling behind, or advanced, our courses are customizable to any environment and built to Learning Tools Interoperability (LTI) standards for easy integration with existing systems. Plus, once you sign on, you will be met with a team of professionals dedicated to supporting your unique implementation.

## **Instant Visibility to Student Pacing and Progress**

---

Know exactly how students are pacing with powerful data views that give you unmatched visibility into pacing, progress and performance, supported by integrations with LMS and SIS solutions for easy transfer of assignment and course grades. With our courses, you will never wonder if a student is behind, ahead or right on target with their goals.

## **Unparalleled Course Customization, Flexibility, and Interoperability**

---

Edmentum Courseware makes customization simple. We give the teacher control to restructure content and even add your own custom content to create customized courses and assignments with a few clicks.

## **Aligned to State and National Standards**

---

We build our courses to align to the most up-to-date standards and are a leader in state course approvals. Our customizable Courseware is designed to meet the evolving needs of schools and districts, and we are committed to building quality content with a solid instructional design that focuses on both the acquisition of knowledge and the retention of it. Our brand-new white paper details the educational theory behind our instructional design principals and architecture.

## **Designed to Meet Students Where They Are**

---

Our courses consist of integrated assessments that allow learners to move past content they have already mastered and focus on the concepts that need additional attention.
